32 FIRST AID 30

If inhaled, remove to fresh air. If not breathing give artificial respiration, preferably mouth to mouth. If breathing is difficult, give oxygen. Avoid stimulants: Do not give adrenaline (epinephrine) call a physician. In case of contact, flush eyes promptly with plenty of water for at least 15 minutes. Call a physician. Flush exposed skin with water (not hot) or use other means to warm skin slowly.

34 ATTENTION - WHEN FULL 30

Liquid and gas under pressure. Vapor reduces oxygen available for breathing, can cause rapid suffocation. Inhalation or misuse of product can result in serious personal injury or death. May decompose in contact with hot metal surfaces to release toxic, corrosive decomposition products. Contact of liquid with skin or eyes may cause irritation or frostbite. Overheating, pressurizing or rusting can cause cylinder to burst, resulting in serious personal injury or death.

MINIMUM PRECAUTIONARY MEASURES

- Do not inhale vapors
- Store and use with adequate ventilation-never in a closed space
- Avoid contact with eyes, skin and clothing
- Do not store in direct sunlight or heat above 125°F (51°C)
- Do not store in damp areas
- Do not drop or subject this cylinder to rough handling
- Do not tamper with safety relief device or the valve
- Always properly evacuate recovery machine before charging refrigerants.
